## TEACHING RESOURCE PACK

*The Girl Who Raced the World* is a story set in 1872, during the Victorian era. The book, designed for readers aged 9-12, draws children in with its focus on adventure, exploration, overcoming challenges, and experiencing the world through the eyes of eleven-year-old Maggie Appleton.

It is a fresh new reimagining of one of the greatest adventure stories of all time, *Around the World in Eighty Days*, and will whisk young readers away on the journey of a lifetime. The book is ideal for engaging readers and developing a love of reading as well as supporting wider areas of the curriculum in Geography, English, Science, History and Languages in KS2 and KS3.

This resource pack can be used in full or for stand alone activities across a wide range of areas including class discussion prompts, creative writing activities, STEM projects and Art & Design challenges. Whether taught as complete units or individual activities, we hope you enjoy the adventure!

**Word of the Chapter** – For each chapter there is a word of interest selected from the text. These can be used in a variety of ways –

- Discussion of the word meanings.
- Prompts for looking up in dictionaries independently.
- As writing prompts to embed with the correct context, within sentences.

**Discussion Prompt** – Each chapter also features a question to discuss. They range from discussing the characters and predictions for the book to reflecting more the situations presented. Many of these questions are specifically worded to tie in with the KS2 & KS3 National Curriculum.

**Activity Ideas** – There are a selection of activity ideas that link in with the text, they're numbered by page that they tie in with and can be found below the chapter breakdown. There's a variety of STEM prompts, art and design ideas, opportunities for further research and more – all linking in with the National Curriculum.

**Mapping Project** – This book gives the perfect opportunity for mapping out the journey of Maggie and identifying locations that feature in the story. You may wish to take a detailed approach to marking each location mentioned, or a simpler approach with following the path of the countries and oceans passed through.

## WIDER CURRICULUM ACTIVITY IDEAS

### Page 22 - Geography Prompt

Identify Charing Cross and Dover on a map. Research how long the journey would take between the two. Does the journey time change depending on transport type?

### Page 59 - Art and Design Prompt

Recreate a stained glass window of your own design using the radial symmetry of the 'Rose Window' at Notre-Dame Cathedral. You may wish to use paints, pencils or get more creative with tissue paper and cut cardboard. As an extension, you might like to look at the work of Claire Tabouret who was commissioned to create the replacement windows after the Cathedral's fire in 2019.

### Page 66 - Geography Prompt

Map your own route around the world. This can be as simple as drawing a route on a map or a more detailed itinerary with theoretical routes and timings mapped out. Pick from the following suggestions to help guide your route.

- Climatic Zones - Plan your route to pass through three of the main climatic zones (tropical, dry, temperate, continental & polar)
- Biomes - Plan your route through as many different biomes as you can (tropical rainforest, desert, savannah, tundra, temperate etc)
- Map references - Plan your route crossing through the Equator, Tropic of Cancer, Tropic of Capricorn and into the Arctic Circle.
- City Route - Plan a route that passes through major cities of each inhabited continent. This would also provide opportunity for discussion on international development and urbanisation.

### Page 104 - Writing Prompt

Have you noticed that many of the chapters begin with a descriptive paragraph setting the scene? Write your own description of a location you are familiar with.

## TEACHING RESOURCE PACK

### Page 132 - Writing Prompt

Write your own piece of Poetry describing a Rainforest setting. You may wish to use a thesaurus to expand on your vocabulary.

### Page 172 - STEM Challenge

Create a model boat that can float on water. Consider the properties of the materials you are using for use in water and buoyancy - you may wish to experiment using fair tests for different everyday materials.

### Page 187 - Writing Prompt

Considering your audience, create a leaflet advertising the Firebreather Circus Ship.

### Page 224 - STEM Challenge

Make a sailed-sledge model, to be powered by the wind. Using a fan to provide comparative results, measure how far your design can travel. This would work to support wider discussion around air resistance & friction.

### Page 246 - Writing Prompt

This chapter has lots of descriptions of stormy weather, use this as a starting point to write a personal letter recounting the experience of the storm.

### Page 280 - Art Prompt

Create an illustration depicting a celebratory scene using the descriptions in the text as reference points.
